

Sabre Engines

Dear Gerry,

**Subject: Fuel Set**

Sabre Engines are not able to give a formal approval for your fuel additive "Fuel Set". We do not have an endurance test programme in which we could evaluate the product fully. However from the promotional material and talks with you we have no reason to disapprove the product.

We will warrant the engine under our normal terms and conditions, but should any problem arise which can be attributed to the use of your product then the engine repair would not be covered.

Yours faithfully,  
**SABRE ENGINES LTD**  
**A.J. Pattle**  
**Engineering Manager**
