

Swiss Port

Dear Chris,

Just a brief note to say how delighted we are with the Fuel Set product. As you know we add at source into our bowser for direct delivery into the fleet, this has proved to be very useful to us on a few issue the primary ones being less blocked fuel filters and other related fuel problems, particularly over the winter period. It has shown a significant reduction in emission problems, which as you are aware at Heathrow, is a very contentious point! Please also would you forward me another drum purchase order number 10662 same delivery address.

Regards,
Graham Spillane
