United Fuel Injection a name synonymous within the Fuel Injection and Turbocharger industries for 40 years prides itself on outstanding customer service, professionalism and highly trained and experienced staff.

To ensure United Fuel Injection remains the market leader we are constantly upgrading both our workshop equipment and as importantly the technical training for our 35 staff including apprentices and Master Bosch Technicians.

United Fuel Injection is Australia's premier diesel injection company with a client base that includes the world's largest resource companies operating here in Western Australia. With fleets comprising thousands of pieces of diesel equipment including trucks, trains, loaders and excavators, these companies rely on United Fuel Injection to keep their equipment working.

United only use and recommend the very best products on the market and over the years we have seen many products claiming to be the best fuel conditioner available. Fuel conditioners are necessary in addressing issues with modern fuels, especially diesel and FCC is the only fuel conditioner we use. Being non-toxic, non-hazardous and non-flammable, FCC is safe for my staff and my clients whilst being the best performing product we have used.

A handwritten signature in black ink, appearing to be 'Paul Cameron', with a long horizontal line extending to the right.

Paul Cameron
Operations Director
UNITED FUEL INJECTION
