Letter of Introduction

Dear Colas Team,

I understand ChoiceChem together with AddFuel have established a supply chain into North America. I write this letter by means of introduction for you to AddFuel and their product FCC Fuel Conditioner.

Over the last few years we have been using FCC Fuel Conditioner in the majority of our machinery/vehicles mainly due to the maintenance issues we were experiencing, particularly with regard to the fuel Injectors. At one stage we were requiring servicing or to change the injectors and fuel lines on a regular basis due to ongoing issues.

Since the introduction of FCC into our fuel supply we have not had one injector change in the last 12 months and all vehicles are running smoothly. Please see the attached appendix which lists the various machinery and vehicles FCC has been used in.

The ease of implementation has also been a huge factor for us. FCC is simply added to the bulk tank when it is refuelled, ensuring all our vehicles and machinery then gain from the benefits.

With regard to the fuel saving, I have just started to monitor the fuel savings and with early results look positive.

I wish the AddFuel team every success in North America with their great product. I am contactable on the below email address should you have any follow up questions.

Kind Regards

A handwritten signature in blue ink, appearing to read "John McLuckie", is written over a light blue horizontal line.
